PLASMA TABLES | PIPE ATTACHMENT

Auto Torch Height Control Linear Guideways

Pipe cutting attachment Panasonic Servo Drives

SPECIFICATIONS

- Pipe cutting servo controlled attachment
- Laser alignment light on cutting head
- Use your own Hypertherm plasma unit (mechanised torch head and interface cable needed)
- Wireless remote control
- Panasonic servo motors and drives
- 1500 x 3000mm cutting area (2000mm x 4000mm optional)
- 200mm torch travel height
- FASTCAM CAD part creation & nesting offline software
- NSK bearings - Japan BC
- linear guideways - X & Y axis
- Ballscrew for head up & down
- Built in dust extraction fan
- Bridge parking area at end of machine clears the table for loading & unloading
- X axis dual side drives with Panasonic servo motors
- Table strong enough to handle 900kgs = eg: (25mm plate 1500 x 3000)
- Pull out scrap trays on side of the machine for easy cleaning or small part retrieval
- Automatic torch height control
- Large screen Starfire CNC controller with inbuilt parts library
- Taiwanese quality linear bearings & guide-ways
- Ball Transfers on table surrounds for easy sheet loading
- Drives by dual helical rack & pinion for smooth running and long life
- Safety guards on all drive components
- Dust covers on slideways

The LINIA CNC Plasma Cutting machines from Complete Machine Tools give you the speed, accuracy and ease of your own CNC plasma machine at a super competitive price.

The servo controlled pipe cutting attachment is simple to program and a fantastic addition to the plasma cutting table for those who need to cut pipe as well as plate. You have the ability to cut numerous shapes and sizes and makes light work of those jobs needing pipe work done. The pipe cutting attachment takes away those jobs where time consuming manual processes are needed in order to get the job out. The size range of pipe that can be cut is 50mm - 292mm and a max of 3m in length

Supplied complete with programming and nesting software from FASTCAM as well as an extractor fan in the base of the table your LINIA plasma cutter can be set up and running in just a couple of hours!

The machine comes standard with a wireless remote control for quick and easy setup and positioning of the machine saving time when setting up a new job and making it simple to maneuver around the machine. Auto homing & zero position setting makes a tedious job simple and quick on a Linia CNC plasma cutting machine.

Fastcam offline software is supplied with the machine, version supplied is the PROFESSIONAL VERSION WITH AUTO NESTING
