

# Autofold I-Fold

## The little coil line for the big jobs!

I-Fold uses standard coil in gauges up to 1.6mm and manufacturing duct sizes from a minimum of 120 x 120mm. I-Fold will make L shapes, U shapes and one piece wraps.

Its fully hydraulic drive is controlled by the Autofold V8 pc control system designed specifically for the machine via a 15" colour touch screen.

The controller stores jobs for processing later, can be linked to a plasma duct software package, not included, for downloading of straight duct or plasma sheets to the I-Fold.

Duct pieces, beaded, flat, notched with male pittsburgh is produced in as little as forty seconds. A production rate equal to even the most expensive coil lines available.

I-Fold comes with one A-Frame uncoiler but up to eight can be specified.

Installation of the machine is so simple the customer the machine is up & running in just a few hours. It requires just one three phase power drop to power the I-Fold.
